

# STOP THE MASTS

Make sure you get  
your objections in  
**now**

467 people objected to a mast proposal off Fulham Palace Road last year and it was stopped.

A developer is proposing to put **mobile phone masts** and other clutter onto the roof of Cobbs Hall on Fulham Palace Rd. (At least 18 transmitters in total, but concealed behind new rooftop screens).

Did anyone from the Council let you know? The most basic display of a Site Notice - to let the nearest residents know about the consultation -- was only seen **after** we started leafleting to alert the public.

- It would make the building skyline look distorted and bulky. It would look totally out of place for the Crabtree conservation area.
- Several homes, a number of schools and nurseries, and the Lillie Road recreation ground are in range of the proposed masts. This is important as young people's bodies are still developing and they are more vulnerable to mast radiation effects. A Chief Medical Officer has called for minimising their exposure.

Yet the proposer did not feel any local schools were worth consulting!

- Trees and other greenery within range would suffer the harmful effects of radiation. They are a key part of the character of the area and provide environmental benefits.

## HAVE YOUR SAY...

- H&F Council invite comments online on <https://bit.ly/2Rz6BGn>  
Please make sure you **at least** object to the visual impact of the bulky screens and masts on the building and the conservation area – this will count. Also the damage that will be caused to trees in the area. For more information about the proposal – tips and a **quick link for objecting by email** - visit our webpage [www.saynoto5g.uk/cobbshall.htm](http://www.saynoto5g.uk/cobbshall.htm).

- You might also be able to post your objection to Steven Mielczarek, Planning Officer, Development Management. LB Hammersmith & Fulham, King Street, London W6 9JU.
- Please quote ref: **2021/01507/FUL** in any objections, and get them in by Wed. 9 June if possible.

## SUPPORT OUR WIDER CAMPAIGN TO MAKE H&F SAFER...

H&F **Say No To 5G** campaign was set up in 2019 to stop the spread of mast radiation that's bad for us, animals & the environment. Visit [www.saynoto5g.uk](http://www.saynoto5g.uk).

We also support the important crowd-funded national legal action [actionagainst5g.org](http://actionagainst5g.org) - the appeal is still open for donations.
